GSA BIC MAC IDIQ - anticipated release in 2Q2022

GSA's Best in Class Multi-Agency Contract (BIC MAC) is set to replace GSA's One Acquisition Solution for Integrated Services (OASIS) contract vehicle. Although it's not meant to replace OASIS exactly, the contract vehicle is expected to have the same broad categories as OASIS, and more. This new contract vehicle will be an Indefinite Delivery, Indefinite Quantity (IDIQ).

Although the draft RFP has not yet been released, there has been plenty of information forthcoming from the government: <https://interact.gsa.gov/group/new-services-multi-agency-contract-mac-community-interest>

GSA is considering having a longer period of performance for this new IDIQ as opposed to the typical 10 years.

Based on feedback from industry and agency customers, the new contract vehicle will likely be one contract, as opposed to a small business and unrestricted contract like OASIS. This means there will be no pools, but Domains instead.

Domains refer to the functional groupings of related services spanning multiple North American Industry Classification (NAICS) Codes. GSA will add new Domains based off data information assessments and needs. Proposed Domains as of the most recent draft are:

- Management and Advisory
- Technical and Engineering
- Research and Development
- Intelligence Services
- Enterprise Solutions
- Environmental Services
- Facilities
- Logistics

Detailed information about each Domain and the corresponding NAICS Codes can be found in Section C of the draft specification: https://interact.gsa.gov/sites/default/files/Section%20C%20-%20Draft_12.14.2021.pdf
