Performance Work Statement

2.1.1. INTRODUCTION

The DLA Energy Facilities Sustainment Directorate is responsible for the stewardship and funding of Sustainment, Restoration, Modernizing and Environmental (SRM & E) for the Department of Defense's (DoD) Petroleum, Oil and Lubricant (POL) infrastructure which supports DLA-owned fuel. Through the SRM&E Programs, DLA-Energy Facility Sustainment Directorate (FSD) ensures maximum operational and mission readiness capabilities. DLA Energy FSD consists of two divisions, Program Management Division and the Engineering, Environmental, Property Division.

DLA Energy Program Management Division (PMD) is responsible for sustaining, restoring and modernizing 75% of the DOD's fixed fuels infrastructure at 563 sites across 391 installations worldwide that store DLA Energy-owned petroleum, oil and lubricants. The \$750 million per year program provides enterprise level Sustainment (maintenance and repair activities to keep facilities in good working order over their expected service lives), Restoration (repairs required to return degraded facilities to good condition) and Modernization (maintenance and repair required to keep facilities functioning beyond their expected service lives or to meet new requirements) at DLA Energy capitalized fuel facilities. The objective of the program is to meet operational and emerging Warfighter requirements. Overall, PMD is responsible for the sustainment, restoration, and modernization of 14,974 real property assets worldwide. PMD currently has 44 personnel and is centrally headquartered at Fort Belvoir.

DLA Energy Engineering, Environmental, Property Division (EEPD) provides comprehensive engineering, environmental, security and property accountability for DLA Energy's supported infrastructure worldwide. The division ensures fixed fuel infrastructure containing DLA-owned fuel meets DOD standards and environmental regulations. The team oversees planning, design, and execution of DLA Energy fuels infrastructure Military Construction Projects worldwide through the DOD Construction Agents. The division also provides environmental services management and technical oversight for all Service requested environmental compliance and restoration requirements. EEPD currently has 64 personnel disbursed both in CONUS as well as the Europe, Africa, and Pacific regions.

FSD projects are managed by pillars: Centrally Managed Programs (CMP), Emergent, Recurring Maintenance and Minor Repair (RMMR), Facility Assessments, Environmental, Fuels systems automation, and MILCON. FSD Project Managers interact with the organization's stakeholders daily to manage POL assets for the Army, Air Force, Navy and Marine Corps. DLA's Enterprise Business System (EBS) is currently the system of record to manage and track all real property assets and financials.

2.1.2 PERFORMANCE OBJECTIVE

The Facility Sustainment Directorate has a requirement for consulting and technical support to advise and assist the Government with strategic planning, process management, data management, strategic support, and senior program management. This support is required to enhance FSDs program and current project management and tracking initiatives in order to meet emerging reporting and metrics requirements. In addition, FSD requires subject matter expertise to aid in determining how to best leverage commercial techniques, incorporate the military construction agent's project management tools to ensure all War Fighter mission requirements are quickly identified and met. FSD requires contractor support to recommend enhancing and supporting FSD's data management, reporting and analytical capabilities for fuel assets, and projects. FSDs procedures and processes have evolved significantly over the last year since EEPD was realigned into the organization and maintaining FSD program process documentation and training is a continuing requirement.

2.3.1.1 Create, update, and maintain all FSD Process Documentation and Reference Materials. Conduct in depth research and analysis on all process material request to ensure they fully capture all processes and meet the needs of the requestor. Processes will often require external collaboration with stakeholders outside FSD. PMD will continue to need support maintaining the six process maps that are already in place. EEPD will require the majority of the process map support since they recently merged with FSD and are working to standardize their processes within the DLA-Energy framework. FSD will also require process support for its Command MIPR processes and agreements to standardize how DLA-E will fund DLA Headquarters requirements via FSD.

2.3.1.2 Provide advisory support on FSD Processes: Advise DLA Energy FSD on the improvement opportunities for the processes that make up the FSD Program as well as the related documentation and reference materials. Improvement opportunities shall be identified through consultation with Program Managers, the Program Analysis and Master Planning (PAMP) team, Branch Chiefs, and other FSD stakeholders. These consultations shall also identify required changes to the processes as a result of changes to DLA policy, processes, or EBS changes.

2.3.1.3 Create additional materials such as Standard Operating Procedures (SOPs), checklists, placements, and presentations to support FSD processes and present information as required.

2.3.1.4 Conduct maintenance: Conduct one update per year of the FSD Process Maps, Standard Operating Procedures, and other process documentation to incorporate improvements and required changes. 2.3.2.5.2 Provide support in response to taskings and request for information on DLA Energy fuel asset costs on an ad hoc basis.

2.3.3 TASK 3 – Provide PMD Program Database Maintenance Support

Task 3 Background: PMD has two existing Microsoft Access databases to track key program metrics for the fuel storage tanks and financial data. One database is the Project Tracker (PT) which tracks projects, Work Breakdown Structure (WBS) elements, and amendments as well as project characteristics such as location, Combatant Commander (COCOM), WBS type, Construction Agent, financial data, and many other project characteristics. The other database is Fuel Asset Management (FAM). Information tracked in FAM includes tank characteristics such as location, capacity, tank type, and fuel type, as well as service status and inspection compliance status. There are a minimum of 50 users that require real-time simultaneous access to the existing database in order to add, edit, report, and analyze information. These two databases are mature products with no enhancements required, but will require maintenance support, including performance monitoring and troubleshooting, to continue to service FSD. The DoD's Sustainment Management System (SMS) Fuels is scheduled to replace the two PMD Databases functionality in fiscal year 2023. If SMS Fuels is released and functional prior to the first option year of this contract, the option for this task will not be exercised and the contract will remain solely as a one-base year requirement. In the event that SMS Fuels release is delayed and the requirement to maintain these databases is still valid, the options may be exercised as required.

2.3.3.1 Provide assistance for the daily functional maintenance associated with the existing FSD Microsoft Office databases and Microsoft Excel workbooks. Maintenance activities shall include:

2.3.3.1.1 Provide troubleshooting and resolving technical issues

2.3.3.1.2 Conduct weekly back-ups

2.3.3.1.3 Implement monthly System Administrator updates and system change requests

2.3.3.2 Migration and Security: Provide assistance in all security testing and documentation required by DLA J6 Information Technology Directorate including a situation where permission is granted by the DLA Enterprise to migrate the existing Project Tracker and FAM databases to a new server or network location. This includes a onetime data transfer from FAM and PT to SMS Fuels.

2.3.4 TASK 4- Conduct EEPD Database Research and Potential Development:

EEPD requires a third access database that will capture their MilCon and Energy Automation Operational Technology Sustainment (EAOTS) Program data to be developed and maintained. EEPD will require an assessment of their current data management and reporting requirements in order to determine how to best construct the database to meet their needs. For the base year, this task will be exercised to conduct the assessment of what the requirements of the access database will be. The database will also be developed and delivered in the base year. For the follow-on option years, two enhancements of the database a year will be released in addition to maintenance and periodic administrative updates.

2.3.4.1 Conduct an assessment of the data management and reporting requirements for the MilCon and EAOTS Program. Conduct a gap analysis, when applicable, to compare FSD's data management and reporting capabilities for FSD Projects with those of EBS. Identify missing capabilities in EBS and make recommendations on prioritizing these for implementation. Develop a strategy and implementation plan for enhancing the data management and reporting capabilities of EEPD and identify requirements for the EEPD data management capability by coordinating with EEPD stakeholders and conducting additional research.

2.3.4.2 Present a plan for developing the new data management and reporting capabilities solution for database and adjust based on stakeholder guidance. Have a clear and detailed plan of what the solution will be and how it will be implemented at the beginning of the first Option Year should it be required. This planning includes coordination with DLA J6 to ensure database can be used on the DLA network. This plan will be presented to FSD leadership no later than 90 days after the contract award and must be approved no later than 120 days after the contract award.

2.3.4.3 Deploy the release of the database tool within 180 days of the award. Provide User Guide Documentation and conduct post release training and follow-on training as needed.

2.3.4.4 Provide ad hoc support for users as needed to troubleshoot and resolve technical issues.

2.3.4.5 Enhancements: The objective of the required enhancements and upgrades to FSDs data management and reporting capabilities for fuel assets is to improve user- friendliness, data integrity, and incorporate new emerging data fields, metrics, and other reporting requirements. Enhancement support services shall include:

2.3.4.5.1 Implement two version enhancements to EEPD's data management and reporting capabilities for fuel assets yearly. Recommended enhancements shall be identified through interactions with the FSD Project Managers, the Program Analysis and Master Planning (PAMP) team, FSD leadership and the Military Construction Agents. The enhancements shall cover data management, program analysis, data integrity and reporting capabilities for all real property assets. The base year will require the deployment and one enhancement. Every option year after will have two enhancements.

2.3.4.5.2 Conduct beta testing and demonstrations of the new functionality for each version enhancement, with the FSD team with the objective of allowing users to become familiar with and provide comments on the new capabilities.

2.3.4.5.3 Training on the enhancements will be provided as required to all users as required.

2.3.4.5.4 Documentation on system changes will be delivered to FSD as required.

2.3.4.6 Provide assistance for the daily functional maintenance associated with the existing EEPD database. Maintenance activities shall include:

2.3.4.6.1 Provide troubleshooting and resolving technical issues

2.3.4.6.2 Conduct weekly back-ups

2.3.4.6.3 Implement monthly System Administrator updates and system change request

2.3.4.6.4 Provide targeted training and desk side assistance to Program Managers, PAMP team, and other EEPD stakeholders with the database functionality

2.3.4.6.5 Assist EEPD with generating reports in support of daily operations

2.3.4.7 Migration and Security: Provide assistance in all security testing and documentation required by DLA J6 Information Technology Directorate including a situation where permission is granted by the DLA Enterprise to migrate the existing Project Tracker and FAM databases to a new server or network location.

2.3.5 TASK 5- Facility Sustainment Model (FSM) Technical and Analytical Support

Task 5 Background: This will only be required in the FY23-24 option year and will not require any contracting support in any other year. It may or may not be required in FY23 depending on if the existing Facility Sustainment Model will require an update or not. In the case that this task is exercised, SRM will require assistance in developing a strategy and implementation plan for conducting Facility Condition Assessments across all DoD sites/installations with capitalized fuel assets. The Facilities Sustainment Model is used to estimate the budget requirements for the maintenance of facilities. DLA Energy and the SRM Office are responsible for providing periodic updates to the Office of the Secretary of Defense for the cost assumptions for the asset categories (i.e., Facility Analysis Codes) under its purview.

2.3.5.1 Develop a strategy and implementation plan for conducting Facility Sustainment Model Assessments updates for the FY-23-24 cycle.

2.3.5.2 Update process material based on FSM update findings.

2.3.5.3 Update Facilities Sustainment Model (FSM) Assumptions: Perform an update in FY23, to the assumptions and inputs required for the Facilities Sustainment Model.

2.3.5.4 Conduct an analysis of the assets under SRM's purview with a focus on the fuel assets. The analysis shall include a summary of changes from the prior FAC level.

2.3.5.5 Collect and analyze maintenance and repair cost data to update sustainment cost assumptions for selected FACs. Make recommendations covering the FY23-24 update cycle.

(c) Previously completed security investigations may be accepted by the Government in lieu of new investigations if determined by the DLA Intelligence Personnel Security Office to be essentially equivalent in scope to the contract requirements. The length of time elapsed since the previous investigation will also be considered in determining whether a new investigation is warranted. To assist the Government in making this determination, the Contractor must provide the following information to the respective DLA Intelligence Personnel Security Office immediately upon receipt of the contract. This information must be provided for each Contractor employee who will perform work on a Federally-controlled facility and/or will require access to Federally controlled information systems:

- (1) Full name, with middle name, as applicable, with social security number;
- (2) Citizenship status with date and place of birth;
- (3) Proof of the individual's favorably adjudicated background investigation or NACI, consisting of identification of the type of investigation performed, date of the favorable adjudication, name of the agency that made the favorable adjudication, and name of the agency that performed the investigation;
- (4) Company name, address, phone and fax numbers with email address;
- (5) Location of on-site workstation or phone number if off-site (if known by the time of award); and
- (6) Delivery order or contract number and expiration date; and name of the Contracting Officer.

(d) The Contracting Officer will ensure that the Contractor is notified as soon as a determination is made by the assigned or cognizant DLA Intelligence Personnel Security Office regarding acceptance of the previous investigation and clearance level.

- (1) If a new investigation is deemed necessary, the Contractor and Contracting Officer will be notified by the respective DLA Personnel Security Office after appropriate checks in DoD databases have been made.
- (2) If the Contractor employee requires access to classified information and currently does not have the appropriate clearance level and/or an active security clearance, the DLA Intelligence Personnel Security Office will relay this information to the Contractor and Contracting Officer for further action. Investigations for Contractor employees requiring access to classified information must be initiated by the Contractor Facility Security Officer (FSO).
- (3) The Contracting Officer will ensure that the respective DLA Intelligence Personnel Security Office initiates investigations for Contractor employees not requiring access to classified information (i.e., IT or unescorted entry).
- (4) It is the Contractor's responsibility to ensure that adequate information is provided and that each Contractor employee completes the appropriate paperwork, as required either by the Contracting Officer or the DLA Intelligence Personnel Security Office, in order to begin the investigation process for the required clearance level.

(e) The Contractor is responsible for ensuring that each Contractor employee assigned to the position has the appropriate security clearance level.

(f) The Contractor shall submit each request for IT access and investigation through the Contracting Officer to the assigned or cognizant DLA Intelligence Personnel Security Office. Requests shall include the following information and/or documentation:

- (1) Standard Form (SF) 85, Questionnaire for Non-Sensitive Positions, or the SF 86, Questionnaire for National Security Positions (see note below);

- (2) Proof of citizenship (i.e., an original or a certified copy of a birth certificate, passport, or naturalization certificate); and
- (3) Form FD-258, Fingerprint Card (however, fingerprinting can be performed by the cognizant DLA Intelligence Personnel Security Office).

(Note to (f)(1) above: An investigation request is facilitated through use of the SF 85 or the SF 86. These forms with instructions as well as the Optional Form (OF) 306, Declaration for Federal Employment, which is required with submission of the SF85 or SF 86, are available at the Office of Personnel Management's (OPM) system called Electronic–Questionnaires for Investigations Processing (e-QIP). Hard copies of the SF85 and SF86 are available at OPM's web-site, www.opm.gov, but hard copies of the forms are not accepted.)

(g) Required documentation, listed above in paragraphs (f) (1) through (3), must be provided by the Contractor as directed by the Contracting Officer to the cognizant DLA Intelligence Personnel Security Office at the time of fingerprinting or prior to the DLA Intelligence Personnel Security Office releasing the investigation to OPM.

(h) Upon completion of the NACI, NACLC, SSBI, or other sufficient, appropriate investigation, the results of the investigation will be forwarded by OPM to the appropriate adjudication facility for eligibility determination or the DLA Intelligence Personnel Security Office for review and determination regarding the applicant's suitability to occupy an unescorted entry position in performance of the DLA contract. Contractor personnel shall not commence work on this effort until the investigation has been favorably adjudicated or the Contractor employee has been waived into the position pending completion of adjudication. The DLA Intelligence Personnel Security Office will ensure that results of investigations will be sent by OPM to the Department of Defense, Consolidated Adjudications Facility (DoD CAF) or DLA Intelligence Personnel Security Office.

(i) A waiver for IT level positions to allow assignment of an individual Contractor employee to commence work prior to completion of the investigation may be granted in emergency situations when it is determined that a delay would be harmful to national security. A request for waiver will be considered only after the Government is in receipt of the individual Contractor employee's completed forms, the background investigation has been initiated and favorable FBI fingerprint check has been conducted. The request for a waiver must be approved by the Commander/Director or Deputy Commander/Director of the site. The cognizant DLA Intelligence Personnel Security Office reserves the right to determine whether a waiver request will be forwarded for processing. The individual Contractor employee for which the waiver is being requested may not be assigned to a position, that is, physically work at the Federally-controlled facility and/or be granted access to Federally-controlled information systems, until the waiver has been approved.

(j) The requirements of this clause apply to the prime Contractor and any subcontractors the prime Contractor may employ during the course of this contract, as well as any temporary employees that may be hired by the Contractor. The Government retains the right to request removal of Contractor personnel, regardless of prior clearance or adjudication status whose actions, while assigned to this contract, who are determined by the Contracting Officer to conflict with the interests of the Government. If such removal occurs, the Contractor shall assign qualified personnel, with the required investigation, to any vacancy.

(k) All Contractor personnel who are granted access to Government and/or Federally-controlled information systems shall observe all local automated information system (AIS) security policies and procedures. Violations of local AIS security policy, such as password sharing, performing personal work, file access violations, or browsing files outside the scope of the contract, will result in removal of the Contractor employee from Government property and referral to the Contractor for appropriate disciplinary action. Actions taken by the Contractor in response to a violation will be evaluated and will be reflected in the Contractor's performance assessment for use in making future source selection decisions. In addition, based on the nature and extent of any violations of AIS security policy, the Government will consider whether it needs to pursue any other actions under the contract such as a possible termination.

(l) The Contractor may also be required to obtain a Common Access Card (CAC) or Installation Access Badge for each Contractor employee in accordance with procedures established by DLA. When a CAC is required, the Contracting Officer will ensure that the Contractor follows the requirements of Homeland Security Presidential Directive 12 and any other CAC-related requirements in the contract. The Contractor shall provide, on a monthly basis, a listing of all personnel working under the contract that have CACs.

(m) Contractor personnel must additionally receive operations security (OPSEC) and information security (INFOSEC) awareness training. The DLA annual OPSEC refresher training and DLA annual INFOSEC training will satisfy these requirements and are available through the DLA Intelligence Office.

(n) When a Contractor employee who has been granted a clearance is removed from the contract, the Contractor shall provide an appropriately trained substitute who has met or will meet the investigative requirements of this clause. The substitute may not begin work on the contract without written documentation, signed by the Contracting Officer, stating that the new Contractor employee has met one of the criteria set forth in paragraphs (c), (d), or (i) of this clause, (i.e., acceptance of a previously completed security investigation, satisfactory completion of a new investigation, or a waiver allowing work to begin pending completion of an investigation). Contractor individual employees removed from this contract as a result of a violation of local AIS security policy are removed for the duration of the contract.

(o) The following shall be completed for every employee of the Government Contractor working on this contract upon contract expiration. Additionally, the Contractor shall notify the contracting officer immediately in writing whenever a Contractor employee working on this contract resigns, is reassigned, is terminated or no longer requires admittance to the Federally-controlled facility or access to Federally-controlled information systems. When the Contractor employee departs, the Contractor will relay departure information to the cognizant DLA Intelligence Personnel Security Office and the Trusted Agent (TA) that entered the individual into the Trusted Associated Sponsorship System (TASS), so appropriate databases can be updated. The Contractor will ensure each departed employee has completed the DLA J6 Out-Processing Checklist, when applicable, for the necessary security briefing, has returned any Government-furnished equipment, returned the DoD CAC and DLA (or equivalent Installation) badge, returned any DoD or DLA vehicle decal, and requested deletion of local area network account with a prepared Department of Defense (DD) Form 2875. The Contractor will be responsible for any costs involved for failure to complete the out processing, including recovery of Government property and investigation involved.

(p) These Contractor security requirements do not excuse the Contractor from meeting the delivery schedule/performance requirements set forth in the contract or waive the delivery schedule/performance requirements in any way. The Contractor shall meet the required delivery schedule/performance requirements unless the contracting officer grants a waiver or extension.

(q) The Contractor shall not bill for personnel, who are not working on the contract while that Contractor employee's clearance investigation is pending.

 - (i) Is not affiliated with the prime contractor or a first-tier subcontractor on the program or effort, or with any direct competitor of such prime contractor or any such first-tier subcontractor in furnishing end items or services of the type developed or produced on the program or effort; and

(4) Any such non-disclosure agreement shall address the restrictions on the covered Government support contractor's use of the data as set forth in the clause at 252.227-7025, Limitations on the Use or Disclosure of Government-Furnished Information Marked with Restrictive Legends. FAR 52.204-19 INCORPORATION BY REFERENCE OF REPRESENTATIONS AND CERTIFICATIONS (DEC 2014)

The Contractor's representations and certifications, including those completed electronically via the System for Award Management (SAM), are incorporated by reference into the contract.

FAR 52.204-26 COVERED TELECOMMUNICATIONS EQUIPMENT OR SERVICES-REPRESENTATION (OCT 2020)

(a) Definitions. As used in this provision, "covered telecommunications equipment or services" and "reasonable inquiry" have the meaning provided in the clause 52.204-25, Prohibition on Contracting for Certain Telecommunications and Video Surveillance Services or Equipment.

(b) Procedures. The Offeror shall review the list of excluded parties in the System for Award Management (SAM) (<https://www.sam.gov>) for entities excluded from receiving federal awards for "covered telecommunications equipment or services".

(c) (1) Representation. The Offeror represents that it ☐ does, ☐ does not provide covered telecommunications equipment or services as a part of its offered products or services to the Government in the performance of any contract, subcontract, or other contractual instrument.

(2) After conducting a reasonable inquiry for purposes of this representation, the offeror represents that it ☐ does, ☐ does not use covered telecommunications equipment or services, or any equipment, system, or service that uses covered telecommunications equipment or services.

FAR 52.209-5 CERTIFICATION REGARDING RESPONSIBILITY MATTERS (AUG 2020)

(a) (1) The Offeror certifies, to the best of its knowledge and belief, that—

(i) The Offeror and/or any of its Principals—

(A) Are ☐ are not ☐ presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contract by any Federal agency;

(B) Have ☐ have not ☐, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) contract or subcontract; violation of Federal or State antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property (if offeror checks "have", the offeror shall also see 52.209-7, if included in this solicitation);

(C) Are ☐ are not ☐ presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph (a)(1)(i)(B) of this provision;

(D) Have ☐, have not ☐, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an

amount that exceeds the threshold at 9.104-5(a)(2) for which the liability remains unsatisfied.

(1) Federal taxes are considered delinquent if both of the following criteria apply:

(i) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(ii) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(2) *Examples.*

(i) The taxpayer has received a statutory notice of deficiency, under I.R.C. § 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(ii) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. § 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(iii) The taxpayer has entered into an installment agreement pursuant to I.R.C. § 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(iv) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(ii) The Offeror has ☐ has not ☐, within a three-year period preceding this offer, had one or more contracts terminated for default by any Federal agency.

(h) *Certification Regarding Responsibility Matters (Executive Order 12689)*. (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals–

(1) ☐ Are, ☐ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) ☐ Have, ☐ have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) ☐ Are, ☐ are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) ☐ Have, ☐ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at 2.104-5(a)(2) for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) *The tax liability is finally determined*. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) *The taxpayer is delinquent in making payment*. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples*.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

(i) *Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126)*. [The Contracting Officer must list in paragraph (i)(1) any end products being acquired under this solicitation that are included in the List of Products Requiring Contractor Certification as to Forced or Indentured Child Labor, unless excluded at 22.1503(b).]

Listed End Product

Listed Countries of Origin

(2) *Certification*. [If the Contracting Officer has identified end products and countries of origin in paragraph (i)(1) of this provision, then the offeror must certify to either (i)(2)(i) or (i)(2)(ii) by checking the appropriate block.]

(i) The offeror will not supply any end product listed in paragraph (i)(1) of this provision that was mined, produced, or manufactured in the corresponding country as listed for that product.

(ii) The offeror may supply an end product listed in paragraph (i)(1) of this provision that was mined, produced, or manufactured in the corresponding country as listed for that product. The offeror certifies that it has made a good faith effort to determine whether forced or indentured child labor was used to mine, produce, or manufacture any such end product furnished under this contract. On the basis of those efforts, the offeror certifies that it is not aware of any such use of child labor.

FAR 52.229-11 TAX ON CERTAIN FOREIGN PROCUREMENTS—NOTICE AND REPRESENTATION (JUN 2020)

(a) Definitions. As used in this provision—

Foreign person means any person other than a United States person.

Specified Federal procurement payment means any payment made pursuant to a contract with a foreign contracting party that is for goods, manufactured or produced, or services provided in a foreign country that is not a party to an international procurement agreement with the United States. For purposes of the prior sentence, a foreign country does not include an outlying area.

United States person as defined in 26 U.S.C. 7701(a)(30) means

(1) A citizen or resident of the United States;

(2) A domestic partnership;

(3) A domestic corporation;

(4) Any estate (other than a foreign estate, within the meaning of 26 U.S.C. 701(a)(31)); and

(i) A court within the United States is able to exercise primary supervision over the administration of the trust; and

(ii) One or more United States persons have the authority to control all substantial decisions of the trust.

(b) Unless exempted, there is a 2 percent tax of the amount of a specified Federal procurement payment on any foreign person receiving such payment. See 26 U.S.C. 5000C and its implementing regulations at 26 CFR 1.5000C-1 through 1.5000C-7.

(c) Exemptions from withholding under this provision are described at 26 CFR 1.5000C-1(d)(5) through (7). The Offeror would claim an exemption from the withholding by using the Department of the Treasury Internal Revenue Service Form W-14, Certificate of Foreign Contracting Party Receiving Federal Procurement Payments, available via the internet at www.irs.gov/w14. Any exemption claimed and self-certified on the IRS Form W-14 is subject to audit by the IRS. Any disputes regarding the imposition and collection of the 26 U.S.C. 5000C tax are adjudicated by the IRS as the 26 U.S.C. 5000C tax is a tax matter, not a contract issue. The IRS Form W-14 is provided to the acquiring agency rather than to the IRS.

(d) For purposes of withholding under 26 U.S.C. 5000C, the Offeror represents that

(1) It ☐ is ☐ is not a foreign person; and

(2) If the Offeror indicates "is" in paragraph (d)(1) of this provision, then the Offeror represents that—I am claiming on the IRS Form W-14 [] a full exemption, or [] partial or no exemption [Offeror shall select one] from the excise tax.

(e) If the Offeror represents it is a foreign person in paragraph (d)(1) of this provision, then—

(1) The clause at FAR 52.229-12, Tax on Certain Foreign Procurements, will be included in any resulting contract; and

(2) The Offeror shall submit with its offer the IRS Form W-14. If the IRS Form W-14 is not submitted with the offer, exemptions will not be applied to any resulting contract and the Government will withhold a full 2 percent of each payment.

(f) If the Offeror selects "is" in paragraph (d)(1) and "partial or no exemption" in paragraph (d)(2) of this provision, the Offeror will be subject to withholding in accordance with the clause at FAR 52.229-12, Tax on Certain Foreign Procurements, in any resulting contract.

(g) A taxpayer may, for a fee, seek advice from the Internal Revenue Service (IRS) as to the proper tax treatment of a transaction. This is called a private letter ruling. Also, the IRS may publish a revenue ruling, which is an official interpretation by the IRS of the Internal Revenue Code, related statutes, tax treaties, and regulations. A revenue ruling is the conclusion of the IRS on how the law is applied to a specific set of facts. For questions relating to the interpretation of the IRS regulations go to <https://www.irs.gov/help/tax-law-questions>.

(c) *Period for acceptance of offers.* The offeror agrees to hold the prices in its offer firm for 30 calendar days from the date specified for receipt of offers, unless another time period is specified in an addendum to the solicitation.

(d) *Product samples.* When required by the solicitation, product samples shall be submitted at or prior to the time specified for receipt of offers. (C) If this solicitation is a request for proposals, it was the only proposal received.

(ii) However, a late modification of an otherwise successful offer, that makes its terms more favorable to the Government, will be considered at any time it is received and may be accepted.

(3) Acceptable evidence to establish the time of receipt at the Government installation includes the time/date stamp of that installation on the offer wrapper, other documentary evidence of receipt maintained by the installation, or oral testimony or statements of Government personnel.

(4) If an emergency or unanticipated event interrupts normal Government processes so that offers cannot be received at the Government office designated for receipt of offers by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation or other notice of an extension of the closing date, the time specified for receipt of offers will be deemed to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(5) Offers may be withdrawn by written notice received at any time before the exact time set for receipt of offers. Oral offers in response to oral solicitations may be withdrawn orally. If the solicitation authorizes facsimile offers, offers may be withdrawn via facsimile received at any time before the exact time set for receipt of offers, subject to the conditions specified in the solicitation concerning facsimile offers. An offer may be withdrawn in person by an offeror or its authorized representative if, before the exact time set for receipt of offers, the identity of the person requesting withdrawal is established and the person signs a receipt for the offer.

(g) *Contract award (not applicable to Invitation for Bids).* The Government intends to evaluate offers and award a contract without discussions with offerors. Therefore, the offeror's initial offer should contain the offeror's best terms from a

price and technical standpoint. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary. The Government may reject any or all offers if such action is in the public interest; accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(h) *Multiple awards.* The Government may accept any item or group of items of an offer, unless the offeror qualifies the offer by specific limitations. Unless otherwise provided in the Schedule, offers may not be submitted for quantities less than those specified. Responses which merely repeat the Performance Work Statement will not be considered as being responsive to the requirements of this RFQ.

SECTION M – EVALUATION FACTORS FOR AWARD

52.212-2 EVALUATION—COMMERCIAL PRODUCTS AND COMMERCIAL SERVICES (NOV 2021)

(a) The Government will award a contract resulting from this solicitation to the responsible contractor whose quote conforming to the solicitation will be most advantageous and the best overall value to the Government: Technical Capability/Risk, Past Performance, and Price considered. The Government reserves the right to award to other than the lowest priced evaluated quote. The following factors in order of importance will be used to evaluate all quotes.

Factor 1 – Technical Capability/ Risk

The following subfactors are equal in importance under Factor 1:

Sub-Factor 1.1: Management Approach and Technical Capabilities

Sub-Factor 1.2: Personnel Qualifications

Factor 2 – Past Performance

Factor 3 – Price

All evaluation factors other than price when combined are more important than price. Vendors are encouraged to provide their best proposal with their initial submission without the need to submit additional information. The Government intends to issue an award without engaging in discussions with vendors but reserves the right to allow clarifications to identify minor technical or administrative errors, however these clarifications will not result in an opportunity to resubmit a quote. The Government also reserves the right to conduct discussions if discussions are determined to be advantageous to the Government to maximize the Government's ability to obtain the best value. If any discussions are conducted it may be either orally or in writing. The scope and extent of discussions are a matter of contracting officer judgement. These statements must not be construed to mean the Government is obligated to conduct any discussions with any vendor.

Only the quotes determined to be technically acceptable (receiving a Technical/Risk rating of Outstanding, Good, or Acceptable) and quotes determined to have a Past Performance rating of Neutral Confidence or above will be further evaluated for award. Price will be evaluated for reasonableness and completeness. An order will be awarded on the basis of a best value tradeoff, and quotes must meet or exceed the acceptability standards. Any offeror who receives an overall technical rating of unacceptable will not be eligible for award. The Government may conduct a pre-award survey of the Offeror's resources to verify technical capability and to assist with the Responsibility Determination as defined in FAR 9.104-1.

Evaluation of Factor 1: Technical Capability/ Risk

The evaluation of this factor will consider completeness, clarity and the ability to successfully perform all tasks and responsibilities stated in Section C, the Performance Work Statement. The Contractor must demonstrate a thorough understanding of the scope and complexity of the work, effective quality control, ability to meet the schedule specified in Section C, and risks.

Subfactor 1, Management Approach and Technical Capabilities:

1. Contractor's understanding of the work, as evidenced by its proposed plan for overall implementation and execution of project.
2. Current corporate capability to perform a contract, including relevant corporate experience.
3. Evidence of a process for ensuring the quality and timeliness of deliverables.
4. Evidence of reach-back capability, including subcontractors, consultants and business partners.

Sub-Factor 2, Personnel Qualifications:

1. Contractor proposes personnel who demonstrate the required knowledge, experience and education that is directly related to strategic planning, program database development, data analysis, workflow process improvement Advisory and Assistance technical support services.
2. The qualifications and depth of experience of individual personnel who have worked on directly related projects will be evaluated.

Technical Capability/Risk rating scale

Adjectival Rating	Description
Outstanding	Quote indicates an exceptional approach and understanding of the requirements and contains multiple strengths, and risk of unsuccessful performance is low.
Good	Quote indicates a thorough approach and understanding of the requirements and contains at least one strength, and risk of unsuccessful performance is low to moderate.
Acceptable	Quote meets requirements and indicates an adequate approach and understanding of the requirements, and risk of unsuccessful performance is no worse than moderate.
Marginal	Quote has not demonstrated an adequate approach and understanding of the requirements, and/or risk of unsuccessful performance is high.
Unacceptable	Quote does not meet requirements of the RFQ, and thus, contains one or more deficiencies, and/or risk of unsuccessful performance is unacceptable. Quote is un-awardable.

Evaluation of Factor 2: Past Performance

Pursuant to FAR Part 8.405-2(c), the Past Performance evaluation factor assesses the degree of confidence the Government has in a Contractor's ability to perform services that successfully meet users' needs, based on a demonstrated record of recent and relevant past performance. The recency, relevancy (including context of the data), and quality (including general trends on Contractor performance and source of the information) shall be considered in evaluating this factor. These considerations will result in one (1) performance confidence assessment rating for each Contractor, as detailed herein.

The Vendor must identify three to five (3-5) recent and relevant past performance references within the last three years (from the issue date of this RFQ). Vendors should relate their Past Performance to Strategic Advisory and Technical Services, concentrating on experiences relevant to the requirements of this RFQ. There is a five (5) page limit for Past Performance. The Vendor shall provide information that demonstrates the relevancy of these experiences to the requirements of this RFQ, as well as to their proposed approach.

Recency is defined as (i) having been completed, or (ii) having been in progress and have a minimum of one year performance history at any point in the last three (3) years from the quote due date of this RFQ. The Government will determine how relevant a recent effort accomplished by the Contractor is to this requirement. Relevancy is defined as past performance that is similar in scope, complexity, and dollar value to the subject procurement.

The Government will review all past performance information collected and/or provided, and determine the quality of the Contractor's performance, general trends, and usefulness of the information and incorporate these into each Contractor's performance confidence assessment rating.

The Government will assess this factor based upon what is presented and may use any other data or information otherwise available that the Contracting Officer (CO) determines to be recent and relevant. The Government reserves the right to consider any information available to it in evaluating an offeror's past performance. This includes, but is not limited to: the Past Performance Information Retrieval System (PPIRS); past performance questionnaires; past and present customers and their employees, and any others who may have useful information; the Contractor's past performance under DLA Energy Contracts Federal Awardee Performance and Integrity Information System (FAPIS), Electronic Subcontract Reporting System (eSRS), or other databases; interviews with Project Managers, Contracting Officers, and Fee Determining Officials; and the Defense Contract Management Agency. The Past Performance evaluation team will review this past performance information and determine the quality and usefulness as it applies to performance confidence assessment. However, the Government reserves the right not to contact all of the references listed by the offeror. The Government also reserves the right to assess the offeror's past performance based solely on the offeror's performance under an existing DLA Energy contract or a previous DLA Energy contract for work similar to that required by the solicitation.

Past Performance will not be compared to past performance of other Contractors, and subcontractor past performance will not be utilized in determining a Contractor's rating. A record of poor performance may be considered an indication that the offeror has failed to conform to contract requirements and/or to standards of good workmanship, adhere to contract schedules, including the administrative aspects of performance; provide reasonable and cooperative behavior and commitment to customer satisfaction; and/or display a business-like concern for the interests of the customer. Offerors shall be afforded an opportunity to address unfavorable reports of past performance, and the offeror's response, or lack thereof, will be taken into consideration. Recent contracts may be examined to ensure that corrective action measures have been put in place to prevent the recurrence of past performance problems. Prompt actions taken to correct performance problems may be considered a reflection of management concern for customer satisfaction; however, such action may not mitigate all negative performance trends. Additionally, a record of acceptable past performance will not result in a favorable assessment of an otherwise unacceptable proposal. Negative past

performance under prior DLA Energy contracts may result in an overall negative past performance rating.

In the case of a Contractor without a record of recent or relevant past performance or for whom information on past performance is not available or so sparse that no meaningful past performance rating can be reasonably assigned, the Contractor may not be evaluated favorably or unfavorably on past performance (see FAR 15.305 (a)(2)(iv)). Therefore, Contractors lacking relevant past performance history shall be determined to have unknown past performance and shall receive a “neutral confidence” evaluation rating for past performance.

Past Performance Rating Method:

Recency: For the Past Performance evaluation factor, recency will be evaluated as either Acceptable or Unacceptable and assigned one of the following ratings.

Past Performance Recency rating scale

Rating	Description
Acceptable	Performance is within last three (3) years from the quote due date of this RFQ
Unacceptable	Performance is NOT within the last three (3) years from the quote due date of this RFQ

Relevancy: For the Past Performance evaluation factor, one of the following relevancy ratings will be assigned to the Contractor:

Past Performance Relevancy rating scale

Rating	Description
Very Relevant	Present/past performance effort involved essentially the same scope and magnitude of effort and complexities this RFQ requires.
Relevant	Present/past performance effort involved similar scope and magnitude of effort and complexities this RFQ requires.
Somewhat Relevant	Present/past performance effort involved some of the scope and magnitude of effort and complexities this RFQ requires.
Not Relevant	Present/past performance effort involved little or none of the scope and magnitude of effort and complexities this RFQ requires.

Upon assessing recency and relevancy, the Government will assign an overall confidence assessment rating to each offeror. The overall confidence rating shall be based on the level of confidence the Government has in the Contractor’s ability to successfully perform the requirements. The Government will assign one of the following five (5) overall confidence assessment ratings to each Contractor based on the Past Performance Quote:

Past Performance Confidence Assessment rating scale

Rating	Description
Substantial Confidence	Based on the Contractor’s recent/relevant performance record, the Government has a high expectation that the Contractor will successfully perform the required effort.
Satisfactory Confidence	Based on the Contractor’s recent/relevant performance record, the Government has a reasonable expectation that the Contractor will successfully perform the required effort.
Neutral Confidence	No recent/relevant performance record is available or the Contractor’s performance record is so sparse that no meaningful confidence assessment rating can be reasonably assigned. The Contractor may not be evaluated favorably or unfavorably on the factor of past performance. In the case of no recent/relevant performance record, the Contractor’s past performance is unknown and assigned a performance confidence rating of “neutral.”
Limited Confidence	Based on the Contractor’s recent/relevant performance record, the Government has a low expectation that the Contractor will successfully perform the required effort.

No Confidence	Based on the Contractor's recent/relevant performance record, the Government has no expectation that the Contractor will be able to successfully perform the required effort.
---------------	---

An assessment of past performance information is separate from the responsibility determination required under Subpart 9.1.

Evaluation of Factor 3: Price

Price will be evaluated, but not assigned a rating. The Government intends to award a firm fixed price contract from this solicitation. The Government will establish a "Total Evaluated Price to the Government" for each Offeror by multiplying the Offeror's proposed unit price for each CLIN as listed in the Schedule Section, inclusive of option CLINs, by the quantity (12 months) for each CLIN to calculate an extended price. Additionally, the Government will include a six-month option to extend services at the end of the last option year using the proposed prices for the last option year CLINs. The sum of the extended prices will be used to determine the "Total Evaluated Price to the Government".

Total quoted prices will be compared with competitor pricing, current contract prices, market research, Government estimates, previous pricing, market indices, the Contracting Officer's knowledge of market prices, and other pricing indicators when applicable. Prices shall be analyzed to determine whether prices are fair and reasonable.

The Government values a superior technical quote over selecting the lowest evaluated price quote. However, the Government will not make an award at a price premium considered disproportionate to the benefits associated with a technically superior quote.

The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. Unrealistic price quotes may be viewed as an indication that a contractor lacks understanding of the requirements and may result in exclusion from the competitive range. Evaluation of options shall not obligate the Government to exercise the option(s).
